Expected Result
User's registration page load successfully
Registration page input fields clearly visible
All the input fields able to take inputs

Registration page successfully submitted

Registration successful

Registration successful

Registration successful

Registration will unsuccessful and show all mandatory input fields to must be filled before submitting

Registration will unsuccessful and show all the mandatory input fields to must be filled before submitting

Registration will be successful

Registration will be unsuccessful and show only valid inputs are allowed in mandatory fields

Registration will be unsuccessful and show all the mandatory fields must be filled by valid inputs

Registration successful

Registration successful with Male/Female option

Only option can be select not two at the same time

Registration successful

message appears for not any numeric,special characters are allowed in First Name block and registration will be unsuccessful

Registration successful

message appears for not any numeric,special characters are allowed in Last Name block and registration will be unsuccessful

Registration successful with this email id

Show the error of invalid email id

Registration unsuccessful with this registered email id

Newsletter input fields by default checked and can be unchecked after

Registration successful on checked Newsletter option

Registration successful on unchecked Newsletter option

Auto suggest strong password

Password field indicates that the password must be lies in length 6-16,upercase,lowercase,numeric and special characters

Password accepted

Show the error message of Unmatched input of Confirm password and Password

Password accepted and ready for completing the registration

Login unsuccessful and display the error message of Invalid Email and Password

Login successful
